1. Calcium Chloride Pre-Wet System Report  
   • Matt Wade, DPW Streets & Utilities Manager

Streets & Utilities Manager Wade reviewed the information presented in the agenda packet. By using a pre-wet system on all three of the City’s salt trucks, the City would save 5-10% salt usage, at approximately $4,000 year. Sand usage would also be reduced which would save on catch basin and street cleaning every spring.

   • Pat McGinnis, City Manager

City Manager McGinnis reported that the MEDC awarded the City a $50,000 grant to help fund this study. The Beyond the Pier Steering Committee would be presenting the findings at the January 4 council meeting.

Community Development Manager Howland reviewed the portion of the study regarding the next steps to be taken. All of the information on this project could be found at www.beyondthepiergh.com.
